UML Class diagram

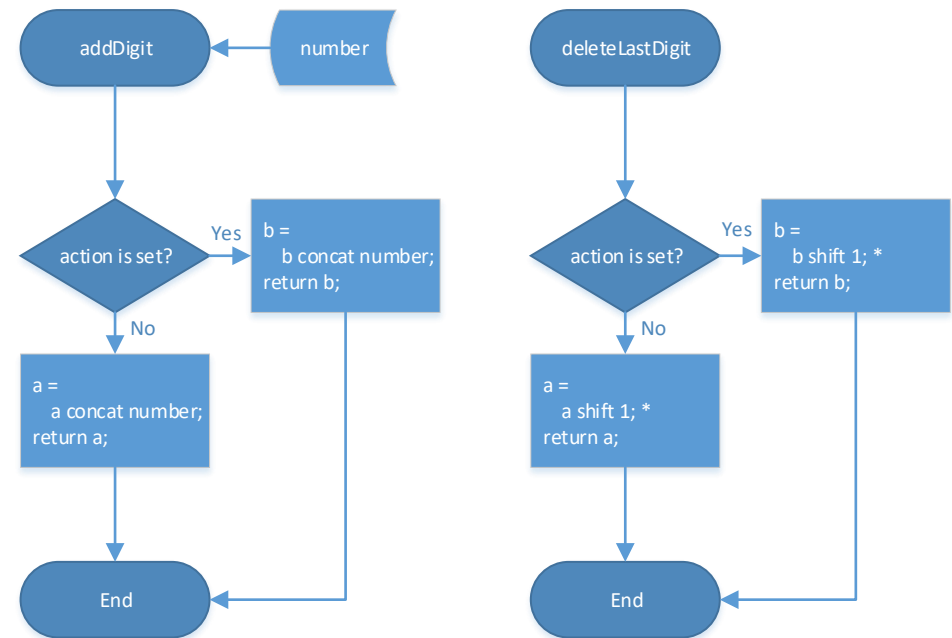

Calculation Stack

Working logic:

Methods' algorithms:

* (pseudo code)

"shift(1)" means shifting everything to the right
example: "abc".shift(1) = "ab"

Styling with custom font

```
@import url('https://fonts.googleapis.com/css2?family=Orbitron&display=swap');  
  
.display {  
  font-family: 'Orbitron', sans-serif;  
}
```

MVC conception
